## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to a method for forming shallow contact interconnect structure, classified in class 257, subclass 774.
- II. Claims 18-37, drawn to a contact interconnect structure, classified in class 438, subclass 629.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the group II invention could be made by a material different process. For example, selectively forming a first set of dielectric layers into spaced parts to form a first set of openings, instead of forming a first set of dielectric layers to form a first thickness for etching a first set of openings.

Because these inventions are distinct for the reasons give above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2811
